Root Elements

	Element	Description
↔	DISPATCHNOTIFICATION	Shipping notification
↔	INVOICE	Invoice
↔	ORDER	Order
↔	ORDERRESPONSE	Orderresponse

Elements

	Element	Description
↔	ADDRESS	Address information for a business partner
↔	ALLOW_OR_CHARGE	Description of a fixed mark-up or mark-down
↔	ALLOW_OR_CHARGE_DESCR	Textual description of the addition or deduction. Additional information on the reason for the addition or deduction can also be entered in this field.
↔	ALLOW_OR_CHARGE_TYPE	Typification of what type of surcharge or discount is involved (e.g. freight, postage and packing, ...).
↔	ALLOW_OR_CHARGE_VALUE	Description of what the addition or deduction consists of. The type of addition or deduction (percentage, absolute, natural, addition) is determined by the sub-element used. Both additions and deductions are described by positive values.
↔	ALLOW_OR_CHARGES_FIX	List of fixed surcharges or discounts that are still applied to the price.
↔	ALLOW_OR_CHARGES_TOTAL_AMOUNT	Sum over all additions and deductions that result in a monetary amount.
↔	AOC_MONETARY_AMOUNT	
↔	CONTROL_INFO	Tax information for the automatic processing of the business document.
↔	CUSTOMER_ORDER_REFERENCE	Reference information on the order of the customer (the buyer) to which the position relates.
↔	DELIVERY_DATE	Period of time or point in time for the delivery date (or the performance of the service).
↔	DELIVERY_END_DATE	
↔	DELIVERY_IDREF	Reference to the unique identifier of the recipient (delivery address and contact). The reference must point to a PARTY_ID of a final recipient within the document. reference.

↔ DELIVERY_REFERENCE	Reference information on the delivery to which the reference item refers.
↔ DELIVERY_START_DATE	
↔ DELIVERYNOTE_ID	Unique delivery note number
↔ DISPATCHNOTIFICATION	Shipping notification
↔ DISPATCHNOTIFICATION_DATE	
↔ DISPATCHNOTIFICATION_HEADER	At the header level, information about the business partners and the business document is transferred and presettings are made that can be overwritten at item level.
↔ DISPATCHNOTIFICATION_ID	Unique shipping notification number of the supplier
↔ DISPATCHNOTIFICATION_INFO	Information on the business partners involved and on the identification of the business document
↔ DISPATCHNOTIFICATION_ITEM	The item line contains despatch advice information for exactly one item.
↔ DISPATCHNOTIFICATION_ITEM_LIST	The element DISPATCHNOTIFICATION_ITEM_LIST represents the item level of the despatch advice. The DISPATCHNOTIFICATION_ITEM_LIST is composed of individual items of the despatch advice.
↔ DISPATCHNOTIFICATION_SUMMARY	The summary contains information on the number of item lines in the despatch advice. This information is used for control purposes to verify that all items have been transmitted
↔ GENERATION_DATE	
↔ GENERATOR_INFO	Information on the creator (manual or automatic) of the document
↔ INVOICE	Invoice
↔ INVOICE_DATE	Timestamp of the invoice.
↔ INVOICE_HEADER	At the header level, information about the business partners and the business document is transferred and default settings are made.
↔ INVOICE_ID	Unique ID Invoice number of the supplier
↔ INVOICE_INFO	Billing information for this business document
↔ INVOICE_ISSUER_IDREF	Reference to the unique identifier of a biller. The reference must point to a PARTY_ID of an invoicing party within the document.
↔ INVOICE_ITEM	The item line contains invoice information for exactly one item
↔ INVOICE_ITEM_LIST	The individual invoice items are listed on the item level.

↔ INVOICE_RECIPIENT_IDREF	Reference to the unique identifier of an invoice recipient. The reference must refer to a PARTY_ID of an invoice recipient within the document.
↔ INVOICE_SUMMARY	Summary of invoice information. The information in this element is usually redundant.
↔ LINE_ITEM_ID	The position number uniquely identifies the position line of a document. In combination with the number of the document, the item number forms an unique identification in the business process
↔ MANUFACTURER_INFO	Information about the item that the manufacturer assigns to the item is stored here.
↔ NET_VALUE_EXTRA	Net value of special services included in the business document (e.g. postage, handling fees).
↔ NET_VALUE_GOODS	Invoice total for all items in this business document excluding taxes
↔ ORDER	Order
↔ ORDER_DATE	Timestamp of the order
↔ ORDER_HEADER	At the header level, information about the business partners and the business document is transferred and default settings are made, which can be overwritten at item level.
↔ ORDER_HISTORY	Information on previous orders
↔ ORDER_ID	Unique order number of the purchaser
↔ ORDER_INFO	Order information for this business document.
↔ ORDER_ITEM	The item line contains order information for exactly one item
↔ ORDER_ITEM_LIST	The individual order items are listed in the item level.
↔ ORDER_PARTIES_REFERENCE	Reference to the business partners integrated in the order process
↔ ORDER_REFERENCE	Reference information on the order to which this position refers.
↔ ORDER_SUMMARY	Summary of the order information
↔ ORDERRESPONSE	Orderresponse
↔ ORDERRESPONSE_DATE	Time stamp of the order confirmation.
↔ ORDERRESPONSE_HEADER	In ORDERRESPONSE_HEADER, information about the business partners and the business document is transferred, as well as default settings which can basically be overwritten at item level (ORDERRESPONSE_ITEM).
↔ ORDERRESPONSE_INFO	

↔ ORDERRESPONSE_ITEM	A position line contains the order information for exactly one position. Any number of position lines can be used, but at least one position line must be used.
↔ ORDERRESPONSE_ITEM_LIST	The ORDER_ITEM_LIST element represents the item level of the order. The ORDER_ITEM_LIST is composed of individual order items
↔ ORDERRESPONSE_SUMMARY	The summary contains information about the number of item lines in the order confirmation. This information is used for control purposes to check, that all items have been transmitted.
↔ PARTIAL_DELIVERY	Information about a pending delivery
↔ PARTIAL_DELIVERY_LIST	This element contains information about the (partial) deliveries still outstanding for an order item. For each planned (partial) delivery, an element PARTIAL_DELIVERY is inserted for each planned (partial) delivery, which contains the expected delivery date and the quantity then delivered.
↔ PARTIES	List of business partners relevant to this document
↔ PARTY	Information on the business partner
↔ PARTY_ROLE	Role of the business partner within this document
↔ PRICE_LINE_AMOUNT	Amount of the price for the position line. The value usually results from the multiplication of PRICE_AMOUNT and QUANTITY, but must be explicitly stated.
↔ PRODUCT_ID	Identification of the item. From the sub-elements contained, it must be possible to uniquely identification of the product must be possible.
↔ PRODUCT_PRICE_FIX	Indication of a fixed price for a product
↔ QUANTITY	Delivery quantity
↔ SERIAL_NUMBER	Unique identification of a single product (product instance).
↔ SHIPMENT_ID	The field contains the identification number of the physical consignment, which is usually assigned by the logistics service provider.
↔ SHIPMENT_PARTIES_REFERENCE	In the element SHIPMENT_PARTIES_REFERENCE references to business partners are summarised, that are integrated into the process of delivery processing of the goods.
↔ SUPPLIER_ORDER_ID	Unique order number of the supplier
↔ SUPPLIER_ORDER_REFERENCE	Supplier's reference information on the order to which the item relates.

	<u>TAX_AMOUNT</u>	Amount of the tax. Results from the multiplication of the price and the tax rate (TAX) and is listed explicitly for tax reasons. This amount refers to a position
	<u>TAX_DETAILS_FIX</u>	Details of any tax applied
	<u>TOTAL_AMOUNT</u>	Bruttopreis inklusive aller Zu- oder Abschläge und aller Steuern.
	<u>TOTAL_ITEM_NUM</u>	Enthält die Gesamtzahl der Positionszeilen des Geschäftsdokumentes. Die Information ist redundant und dient zur Kontrolle.
	<u>TOTAL_TAX</u>	Liste der einzelnen Steuersummen
	<u>TRACKING_TRACING_URL</u>	Über diese URL des Logistikdienstleisters kann durch Eingabe der Sendungsnummer (SHIPMENT_ID) die Sendung nachverfolgt werden

↔ INVOICE	Invoice
↔ INVOICE_DATE	Timestamp of the invoice.
↔ INVOICE_HEADER	At the header level, information about the business partners and the business document is transferred and default settings are made.
↔ INVOICE_ID	Unique ID Invoice number of the supplier
↔ INVOICE_INFO	Billing information for this business document
↔ INVOICE_ISSUER_IDREF	Reference to the unique identifier of a biller. The reference must point to a PARTY_ID of an invoicing party within the document.
↔ INVOICE_ITEM	The item line contains invoice information for exactly one item
↔ INVOICE_ITEM_LIST	The individual invoice items are listed on the item level.
↔ INVOICE_RECIPIENT_IDREF	Reference to the unique identifier of an invoice recipient. The reference must refer to a PARTY_ID of an invoice recipient within the document.
↔ INVOICE_SUMMARY	Summary of invoice information. The information in this element is usually redundant.
↔ LINE_ITEM_ID	The position number uniquely identifies the position line of a document. In combination with the number of the

		document, the item number forms an unique identification in the business process
↔	MANUFACTURER_INFO	Information about the item that the manufacturer assigns to the item is stored here.
↔	NET_VALUE_EXTRA	Net value of special services included in the business document (e.g. postage, handling fees).
↔	NET_VALUE_GOODS	Invoice total for all items in this business document excluding taxes
↔	ORDER	Order
↔	ORDER_DATE	Timestamp of the order
↔	ORDER_HEADER	At the header level, information about the business partners and the business document is transferred and default settings are made, which can be overwritten at item level.
↔	ORDER_HISTORY	Information on previous orders
↔	ORDER_ID	Unique order number of the purchaser
↔	ORDER_INFO	Order information for this business document.
↔	ORDER_ITEM	The item line contains order information for exactly one item
↔	ORDER_ITEM_LIST	The individual order items are listed in the item level.
↔	ORDER_PARTIES_REFERENCE	Reference to the business partners integrated in the order process
↔	ORDER_REFERENCE	Reference information on the order to which this position refers.
↔	ORDER_SUMMARY	Summary of the order information
↔	ORDERRESPONSE	Orderresponse
↔	ORDERRESPONSE_DATE	Time stamp of the order confirmation.
↔	ORDERRESPONSE_HEADER	In ORDERRESPONSE_HEADER, information about the business partners and the business document is transferred, as well as default settings which can basically be overwritten at item level (ORDERRESPONSE_ITEM).
↔	ORDERRESPONSE_INFO	
↔	ORDERRESPONSE_ITEM	A position line contains the order information for exactly one position. Any number of position lines can be used, but at least one position line must be used.
↔	ORDERRESPONSE_ITEM_LIST	The ORDER_ITEM_LIST element represents the item level of the order. The ORDER_ITEM_LIST is composed of individual order items

↔ ORDERRESPONSE SUMMARY	The summary contains information about the number of item lines in the order confirmation. This information is used for control purposes to check, that all items have been transmitted.
↔ PARTIAL DELIVERY	Information about a pending delivery
↔ PARTIAL DELIVERY LIST	This element contains information about the (partial) deliveries still outstanding for an order item. For each planned (partial) delivery, an element PARTIAL_DELIVERY is inserted for each planned (partial) delivery, which contains the expected delivery date and the quantity then delivered.
↔ PARTIES	List of business partners relevant to this document
↔ PARTY	Information on the business partner
↔ PARTY ROLE	Role of the business partner within this document
↔ PRICE LINE AMOUNT	Amount of the price for the position line. The value usually results from the multiplication of PRICE_AMOUNT and QUANTITY, but must be explicitly stated.
↔ PRODUCT ID	Identification of the item. From the sub-elements contained, it must be possible to uniquely identify the product.
↔ PRODUCT PRICE FIX	Indication of a fixed price for a product
↔ QUANTITY	Delivery quantity
↔ SERIAL NUMBER	Unique identification of a single product (product instance).
↔ SHIPMENT ID	The field contains the identification number of the physical consignment, which is usually assigned by the logistics service provider.
↔ SHIPMENT PARTIES REFERENCE	In the element SHIPMENT_PARTIES_REFERENCE references to business partners are summarised, that are integrated into the process of delivery processing of the goods.
↔ SUPPLIER ORDER ID	Unique order number of the supplier
↔ SUPPLIER ORDER REFERENCE	Supplier's reference information on the order to which the item relates.
↔ TAX AMOUNT	Amount of the tax. Results from the multiplication of the price and the tax rate (TAX) and is listed explicitly for tax reasons. This amount refers to a position
↔ TAX DETAILS FIX	Details of any tax applied
↔ TOTAL AMOUNT	Bruttopreis inklusive aller Zu- oder Abschläge und aller Steuern.

 <u>TOTAL_ITEM_NUM</u>	Enthält die Gesamtzahl der Positionszeilen des Geschäftsdokumentes. Die Information ist redundant und dient zur Kontrolle.
 <u>TOTAL_TAX</u>	Liste der einzelnen Steuersummen
 <u>TRACKING_TRACING_URL</u>	Über diese URL des Logistikdienstleisters kann durch Eingabe der Sendungsnummer (SHIPMENT_ID) die Sendung nachverfolgt werden

ADDRESS Element

Address information for a business partner

Root Elements

Element	Description
 BUYER_IDREF	This element contains a reference to the buyer. The reference has to point to a PARTY_ID that is defined in the document.
 BUYER_PID	This element contains the product number used by the buying company.
 CITY	
 COUNTRY_CODED	Country code, e.g. FR for France
 DESCRIPTION_SHORT	This element contains the short description of the product. In general, the description should be short and, within the first 40 characters, unique and meaningful, because many software systems can only interpret these 40 characters (i.e. SAP-OCI, SAP R/3).
 EMAIL	e-mail address
 FAX	Fax number
 INTERNATIONAL_PID	This element contains an international product number (e.g., EAN). The underlying standard respectively organisation is given in the 'type' attribute.
 MANUFACTURER_PID	
 NAME	First address line, in most cases the name of the organisation
 NAME2	additional space for address information
 ORDER_UNIT	Unit in which the product can be ordered; it is only possible to order multiples of the product unit. The price also always refers to this unit (or to part of or multiples of it).
 PARTY_ID	This element contains the unique identifier of the business partner.
 PHONE	
 PRICE_AMOUNT	
 STREET	
 SUPPLIER_IDREF	Reference to the supplier. It contains the unique identifier PARTY_ID of the respective party that is defined in the document.
 SUPPLIER_PID	This element contains the product number issued by the supplier. It is determining for ordering the product; it identifies the product in the supplier catalog. In multi-supplier catalogs, however, only the combination of SUPPLIER_PID and SUPPLIER_IDREF identifies a product.
 TAX	Factor for tax applicable to this price. Example: "0.16", corresponds to 16 percent.
 VAT_ID	VAT identification number of the business partner
 ZIP	ZIP code of address
